

Center for Neuromodulation

Meet Our Team

Giselle Perez is a psychiatric-mental health nurse practitioner providing comprehensive outpatient care as part of the neuromodulation team. She is from NYC and earned her BS from Syracuse University and her MS in Nursing from New York University. Her other clinical interests include trauma informed care and advancing mental health equity. She is bilingual in Spanish.

Center for Neuromodulation

Meet Our Team

Yadira Gonzalez is an administrative coordinator. Born and raised in NYC, she has worked in various healthcare settings. As the first person on the team most patients interact with, she provides a welcoming introduction to the center and takes pride in helping patients access top quality and compassionate care.

Center for Neuromodulation

Meet Our Team

Carolina Jimenez is a Transcranial Magnetic Stimulation (TMS) assistant at the Center for Neuromodulation. In addition to administering treatments and coordinating administrative activities, she is also involved in the Center's academic work. Interested in public health and the visual arts, she is passionate about making TMS more accessible and improving mental health outcomes for marginalized communities.
